

NarrowDiode

Diode Laser with new design

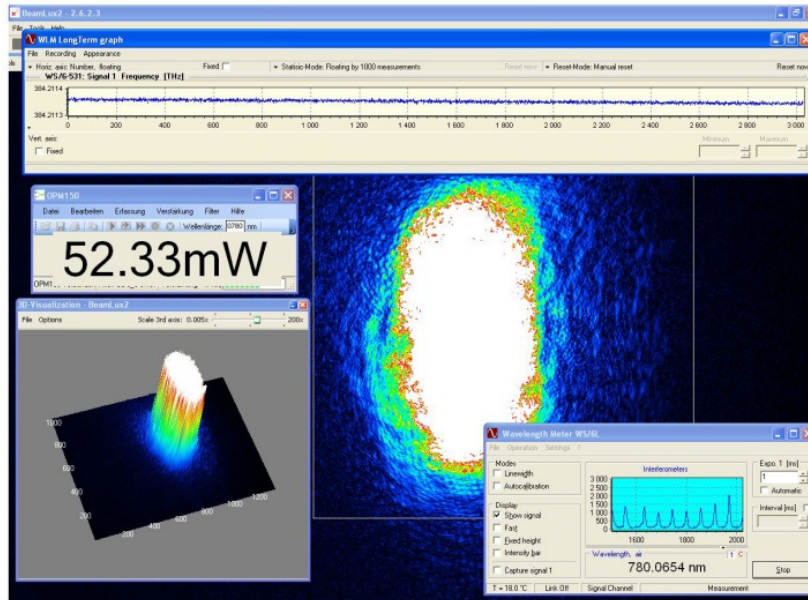

Features:

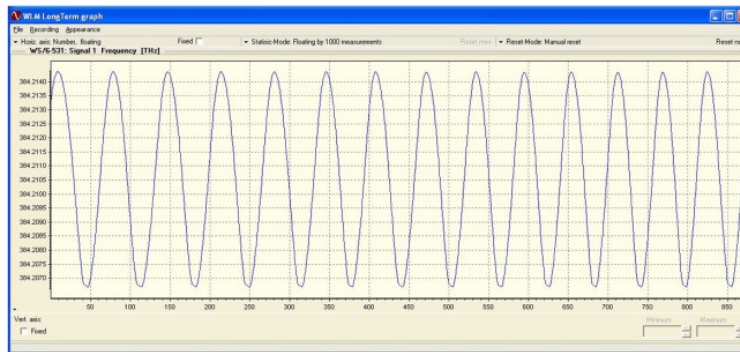

- * Narrow linewidth (down to 20 kHz)
- * 780 nm, 852 nm and 854 nm available
- * Stabilized by interference filter
- * Stable design
- * Easy diode change
- * High-precision mechanical components

Radiant Dyes Laser Acc. GmbH

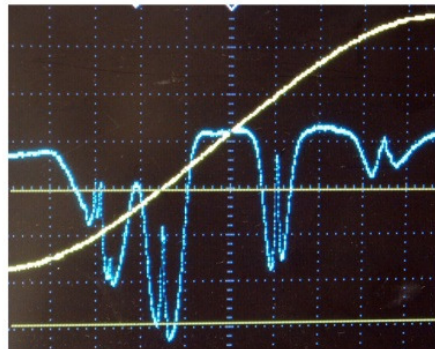

Stability, beam profile and energy of a 780nm **NarrowDiode** Laser:

Mode-hop free scan range with current forward at 780 nm:

Rubidium Spectrum measured with **NarrowDiode** Laser:
